PROFESSIONAL SUMMARY

Software Developer with 1+ years building backend systems, REST APIs, and AI-powered applications using Python, FastAPI and PostgreSQL building RAG pipelines, LLM applications and AI agents with GCP, Docker and CI/CD.

EDUCATION

Chandigarh University

2021 – 2025

Bachelor of Engineering in Computer Science

CGPA: 7.76

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, C/C++

Backend APIs : FastAPI, Flask, Node.js, Express.js, REST APIs, Microservices, API Integration, Asynchronous Processing

Frontend : React.js, TypeScript, CSS, Tailwind CSS

AI LLM : RAG, LangChain, LangGraph, OpenAI SDK, Embeddings, MCP, Vector Databases

Databases : PostgreSQL, MySQL, MongoDB, Oracle

Cloud DevOps : Google Cloud Platform, Docker, CI/CD, Git, GitHub, Vercel, Postman

EXPERIENCE

Done Mortgage

Nov 2025 – Present

Software Developer

- Built **15+** backend services and REST APIs in Python and FastAPI for document-driven automation and workflow processing, cutting manual document handling time by **60%**.
- Built AI document processing and RAG pipelines using LLM APIs, embeddings, pgvector and semantic search, processing **10K+** mortgage documents with **90%+** accuracy in classification, structured data extraction and validation.
- Designed AI agent workflows with LangChain and LangGraph orchestrating **10+** tools for contextual retrieval, workflow automation and confidence-based processing, reducing manual review effort by **40%**.
- Developed a multi-tenant platform using React, TypeScript, PostgreSQL and Supabase serving **50+** organizations, with authentication, RBAC, organization management and PostgreSQL Row-Level Security for secure data isolation.
- Reduced average API response time by **45%** through asynchronous processing, caching and query optimization, and cut deployment time by **50%** with Docker and CI/CD pipelines.

Smarter.Codes

Jul 2025 – Oct 2025

Full Stack Developer

- Developed backend services and REST APIs using Python and FastAPI for AI-driven automation and application workflows.
- Built application workflows for task automation, data processing, API integrations and service-to-service communication.
- Developed and deployed production features using React, JavaScript, Python, FastAPI, Docker, Git and CI/CD across frontend and backend components.
- Performed debugging, API testing, code reviews, performance optimization, and production issue resolution to improve application reliability.

RELEVANT PROJECTS

NoteWell – AI Study Notes & Learning Assistant

(Python, FastAPI, Google Gemini, Whisper, ChromaDB, SQLite, JavaScript, Render)

- Built a full-stack AI learning app that turns YouTube videos, PDFs, DOCX files, audio and text into structured study notes, with clickable timestamps for video sources.
- Implemented content pipelines for transcript extraction (yt-dlp, YouTube Transcript API, Whisper), chunking, Gemini-based summarization and practice-question generation.
- Built RAG-powered chat over saved notes using ChromaDB and sentence-transformers, with note-scoped conversations and saved sessions stored in SQLite.
- Added background processing with live progress updates for long lectures, Beginner/Medium/Expert learning modes, and export to Markdown, DOCX and PDF.

Agentic AI Research Assistant

(Python, FastAPI, LangChain, LangGraph, OpenAI SDK, Weaviate)

- Built an agentic AI research system using LangGraph for multi-step task orchestration, tool execution, contextual reasoning and autonomous workflow management.
- Implemented a RAG pipeline using embeddings, Weaviate vector search and document retrieval to generate grounded AI responses.
- Developed FastAPI REST APIs and asynchronous workflows for AI task execution and real-time response generation, using modular, reusable services.
